Objective

Ambitious Front End Software Engineer with a passion for creating exceptional user experiences. Leveraging expertise in React.js and API integration, I have a proactive approach to organization and meeting deadlines. I am extremely confident in my React.js Skills.

PROJECTS

Shopping Cart Website — HTML, CSS, *React.js*, *Mock API Data*

<https://jocular-meerkat-e5a68b.netlify.app/>

Created a shopping Cart with React.js by Implementing spread operator, react-router-dom v6, mapped through data and set truthy statement, filtered array to remove item, included forEach and prop drilling. Used Ternary operator to render either / or one set of code on screen.

Rock Paper Scissors — *React.js*

<https://chat-for-portf.web.app/>

Designed and developed a dynamic Rock Paper Scissors Game using React.js, showcasing advanced proficiency in front end development and critical thinking skills. I mapped through an array of choices, set multiplayer functionality, showed images dynamically and used “logical and operators”.

Netflix Clone — *TMDB API*, *React.js*

<https://pwr-chess-september.web.app/>

Developed a Netflix Clone utilizing React.js and the TMDB API, showcasing advanced proficiency in front-end development and API integration. Used asynchronous API calls to fetch movie data dynamically, enabling real-time updates of popular titles and genres. This project demonstrates strong technical skills in React.js development and API utilization,

EDUCATION

General Assembly, NYC — *Full Stack Software Engineer*

January 2024 - Present

Learned how to use React.js, make API Calls with Axios, and make full stack applications with Node.js and Express.

SKILLS

JavaScript.

React.js

Node.js

Express

Critical Thinker

Problem Solver
